Quicksilver Repower Products

Scope

Worldwide

Situation

Quicksilver has launched two new product lines that are 100% new content. These are **not** remanufactured engines.

Quicksilver Plus Series

Quicksilver Plus Series are assembled with 100% new parts.

- In the USA, these fall under the same category as new, non-ECT engines for purposes of repower. They require an engine to be returned and appropriate emissions paperwork completed, outlining why an ECT engine cannot be used.
- These engines are non-ECT models. They are not available for sale into the EU, due to the RCD 2017 changes.

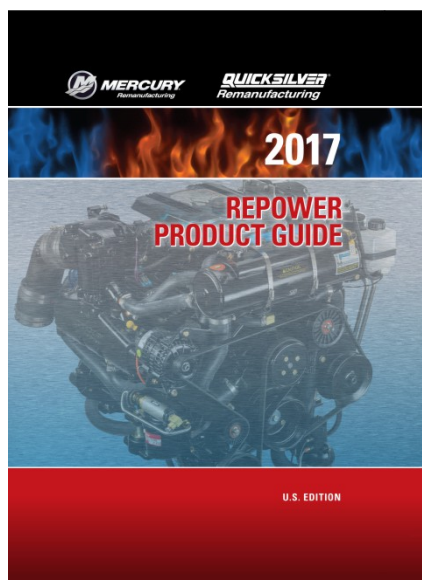

Quicksilver Crate Engines

Quicksilver crate engines are assembled with 100% new parts.

- These engines are major repair part assemblies. They are not complete running engines.
- These engines are available for sale anywhere in the world, including the EU, for the repair of older products.

Additional Information

For additional details, refer to the **2017 Repower Product Guide**, 8M0097386 (U.S. Edition) or 8M0122860 (EMEA Edition).
