

Hi-Performance 2.5L Cylinder Wall Plating

Mercury Hi-Performance has changed plating vendors as of January 1, 1996. The new plating is called Ni-Com®. Because Nikasil® is a registered trademark for our previous vendor, the current plating vendor cannot use that name.

Nikasil® and Ni-Com® are basically the same plating, using the same process to apply, and can be serviced the same way in the field.

All Mercury Hi-Performance literature will refer to Ni-Com® in the future.
