

Propeller Spacer- 1992 & Newer 90-150 h.p.

There is some confusion in the field regarding the use of the proper forward spacer (a) when installing a propeller on the Force 90 thru 150 h.p. Outboard motors.

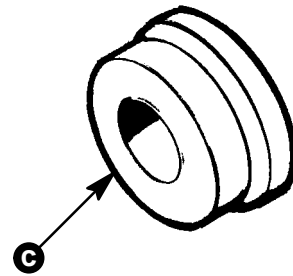

a. Propeller Spacer

The correct propeller spacer (b) to be used with the Mercury/Mariner (48- part number) designed propellers is 23-819057 pictured below.

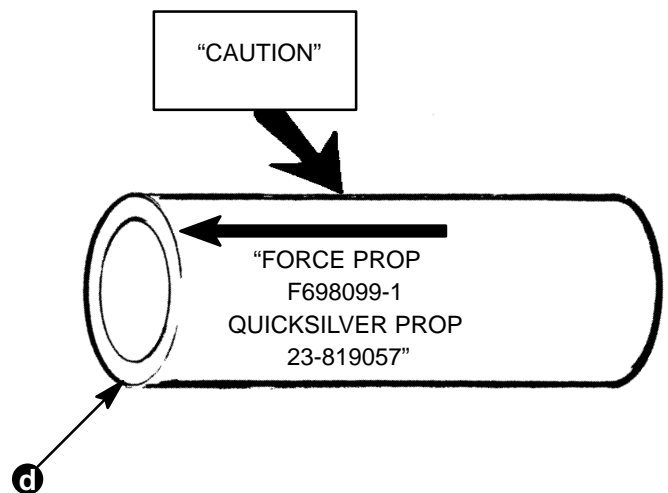

b. Prop Spacer 23-819057 for Mercury designed props

Pictured below (c) is propeller spacer F698099-1, to be used with Force propellers beginning with "FP" part numbers.

c. Prop Spacer F698099-1 for "FP" Force props

The cardboard prop shaft shipping protector, shipped with the engine, identifies both propeller spacers as pictured below (d).

d. Cardboard prop shaft shipping protector
