QUICKSILVER HI-PERFORMANCE GEAR LUBE APPLICATION (P/N 92-816026A4)

Mercury Hi-Performance now recommends Quicksilver Hi-Performance Gear Lube in all hi-performance stern drives which includes the following:

- Bravo One - All
- II Speedmaster - All
- III Speedmaster - All
- IV Speedmaster - All
- V Speedmaster - All
- VI Speedmaster - All
- VII Speedmaster - All

The new gear lube can also be used in TRS and Alpha One SS units, but is not mandatory. The new Hi-Performance Gear Lube has proven superior to the Premium Blend under high stress conditions.

IMPORTANT: It is not recommended to mix the Hi-Performance Blend with the Premium Blend oil. When using the Hi-Performance Blend all of the old gear lube should be drained from the stern drive.
